First General Meeting with Laboratory Safety Officers

Thank you to all the safety officers that joined us on our first general meeting. We are happy to have you involved with team!

Upcoming Event May 2022: Laboratory visits

Responsible: Laboratory safety officers

When: May 2022

As a reminder, we will have another laboratory inspection next May 2022.

There will be awards this year!

Safety Tip of the Month – Training Courses

Training and education are primary means of achieving a safe and healthy working environment. Any person working in a laboratory should take the necessary training courses from EHS. See here the [training curriculum](#)

Not having the necessary training courses could put in danger the person itself, as well as the entire laboratory. Please be mindful and keep up with the necessary training.

Did you know...?

You can report a safety concern, incident or near-miss through the EHS portal. See the form [here](#).

DO NOT use this form to report an emergency, contact UHPD at 713-743-3333.

EHS can use this information to improve safety trainings and to provide better recommendations for incidents or near-misses.

In addition, safety incidents and near-misses should be discussed with the Principal Investigator of the laboratory.

Can you spot all the unsafe behavior from these cartoons?
